PILE BUCK DRIVER OPERATOR in KETCHIKAN, AK

POSITION OVERVIEW

The Pile-Buck Driver Operator is responsible for operating heavy machines that pound steel, concrete, and wood posts into the ground for construction projects.

Essential Functions

- Safely and skillfully operates pile-driving machinery to drive posts into the ground for support of fences, buildings, and other structures.
- Reviews building plans, ensuring pilings are installed accurately.
- Inspects machinery prior to beginning shift to ensure there are no mechanical problems.
- Cleans, lubricates, and performs basic maintenance on machinery.
- and other heavy/light construction equipment.
- Works on the ground with crew when not operating equipment; this may include but is not limited to labor and other tasks.
- Demonstrates continuous effort to improve operations, decrease turnaround times, streamline workflows, and work cooperatively to provide great customer service.
- Consistently show up for work on time and stay for the duration of the shift.
- Exemplifies the culture of hard work and continuous improvement while fostering stability and sustainable growth.
- Ensures safety is an everyday topic and supersedes all other factors to prevent accidents and create a safe working environment for everyone by ensuring equipment is maintained and secure at the work site; following proper equipment operating procedures; and safety procedures and incident reporting procedures are followed. Brings safety concerns and problems to the immediate attention of the Foreman, Superintendent or Safety Manager.
- Fosters a collaborative and inclusive work environment.
